

Technical drawing of a vertical assembly. The drawing shows four identical angled components mounted on a vertical rail. The components are oriented at a 45° angle. Key dimensions are indicated: a vertical distance of 400 units between the top of the first component and the top of the second, a diagonal distance of 400 units from the top of the first component to the top of the second, and a horizontal distance of 116 units between the vertical centerlines of the components.

Technical drawing of a door profile. The top part shows a cross-section of the door with a handle and a lock. The bottom part shows a side view of the door profile with dimensions: 4, 4, 10, and 20,5.

This diagram illustrates the exploded view of a roof assembly. It shows four parallel roof panels (Lamelle) supported by a series of A-Lisene brackets. The Sterndeckel (star cover) is shown as a separate component that fits into the A-Lisene brackets. The diagram is labeled with the following parts:

- A-Lisene
- Sterndeckel
- Lamelle

Technical drawing of a shaft-hub connection. The drawing shows a shaft with a keyway and a hub with a keyway. The shaft is labeled "Loslager" (floating bearing) and the hub is labeled "Festlager" (fixed bearing). Dimensions are given in mm: 25 (shaft diameter), 4 (key width), 10 (key height), 4 (key length), and 20,5 (total length of the assembly).
